

MOH HILMAN RISKI

JUNIOR DEVELOPER

Jakarta Timur, DKI Jakarta | mhilmanriski@gmail.com | www.linkedin.com/in/mhilmanrizq/

A fresh Informatics graduate with hands on experience in web development and product planning, seeking to grow, building technology that solves real problems for real people. Comfortable reading and working with unfamiliar codebases, with a strong attention to detail in both development and documentation. Experienced in collaborative, cross-functional teams and adapting to different project needs. Eager to contribute as an IT Developer by supporting codebase analysis, technical documentation, and continuous improvement initiatives.

SKILLS

- PHP, React, Node, Docker
- Microsoft Word, Excel, Power Point
- Communication, Creativity, Teamwork, Problem Solving, Adaptability

EDUCATION

Bachelor of Informatics at Gunadarma University

2025

- Bachelor of Informatics, Faculty of Industrial Technology GPA 3.54/4.00

Occupation of Programmer Certification - BNSP

2025

EXPERIENCE

Dicoding Bootcamp Batch 12 – Fast Track: AI Web Development

April 2026- Present

- Created architecture and AI integration for a learning management web app within a 4-person team, using AI-assisted development to draft code structure before team-wide implementation.
- Implemented a human-in-the-loop AI learning coach that breaks goals into daily tasks and generates personalized weekly schedules — all recommendations require user approval before applied.
- Contributed across development alongside architecture responsibilities, adapting to team needs throughout the project.

Maganghub Informatics - RSUPN Cipto Mangunkusumo

November 2025 - Mei 2026

- Designed the core system module now used by 8 hospital staff to manage daily operations, reducing manual processing time by 85%.
- Built 15+ dynamic web interfaces supporting 4 key hospital workflows, making it faster for staff to access critical information.
- Assisted in reconstructing the database architecture under mentor guidance, contributing to a cleaner data structure that supports faster and more reliable system performance

Point of Sale (POS) System Cafe

2024

- Collaborated in a team of 6 to deliver a complete point-of-sale system for cafe transactions within 3 months, from requirement gathering to launch.
- Managed data flow for 20 daily transactions, ensuring zero errors in order recording and daily cash reporting.
- Gathered client requirements and coordinated with the team to ensure the system matched daily cafe operational needs.
